CONSTRUCTION NOTICE

B & B Plumbing and Heating, Inc., (B & B), under contract with Hamilton County Water and Wastewater Treatment Authority (WWTA), will be conducting repairs in your neighborhood as part of the Service Lateral Program (SLP) to systematically inspect, test, and repair defective and substandard sewer service lines within the WWTA collection system. The repairs will occur from the building to the main, which is often in the street, as a part of the directive to eliminate as many inflow and infiltration (I&I) sources as possible. The overall goal of the SLP is to reduce and eliminate sanitary sewer overflows, which can send debris and pathogens in our creeks, streams, and waterways.

Champion Cleaning Specialists, Inc. (CCSI), WWTA's video contractor, collected a video of the mains and the laterals (pipes going to home or business), and has determined that repairs are need to be performed at your home or business.

This work is being performed under contracts with WWTA and is done at no additional cost to the property owner. We are sorry for any inconvenience this may cause. We will also repair or restore to the best of our ability any landscaping that we disturb because of work.

Once we have completed the necessary repairs, CCSI will return to video our work. They will make contact, once again, before doing so. If you have any questions or issues please feel free to call Richard Williams with B&B Plumbing & Heating, Inc. at (423) 622-0405.
