# 1.0 Introduction

---

## 1.1 Purpose

The Hamilton County Water and Wastewater Treatment Authority (WWTA) entered into a consent decree with the United States and the State of Tennessee in the case styled *United States of America et. al. v. Hamilton County Water and Wastewater Treatment Authority, No. 1:23cv-00225* (“CD”), which became effective on July 16, 2024. Pursuant to Section IX, paragraph 33 of the CD, WWTA is required to submit reports on a quarterly basis to the Environmental Protection Agency (“EPA”) and Tennessee Department of Environment and Conservation (“TDEC”). WWTA has prepared Quarterly Report No. 3 to satisfy the reporting requirements of the CD.

## 1.2 Requirements

As detailed in Section IX, paragraph 33 of the CD, the WWTA is required to report the date, time, location, source, estimated duration, estimated volume, receiving water, and cause of all sanitary sewer overflows (SSOs) and prohibited bypasses at the Signal Mountain Wastewater Treatment Plant (WWTP) during the reporting period.

## 1.3 Reporting Schedule

Pursuant to Section IX, Paragraph 33 of the CD, the WWTA is required to submit quarterly reports to the EPA and TDEC beginning thirty (30) days after the first (1<sup>st</sup>) full three (3) – month period following the Effective Date of the CD. The CD requires that WWTA submit all subsequent quarterly reports thirty (30) days after each subsequent three (3) – month period thereafter until termination of the CD. The WWTA is submitting a letter to EPA with Quarterly Report No. 1 requesting clarification on the schedule for submitting quarterly and other reports, which is included in Appendix A. The WWTA requests that future reports follow the schedule set forth in that letter.
